SHORT RESUMÉ

2020–202x

Post-Doctoral Researcher

RESEARCHER · Université de Mons 

Data-driven modeling and control of industrial production systems, (lime production in PFR-kiln, and biochemical reactors for the pharmaceutical industry). Development of the pqEDMD algorithm: a system agnostic platform for data-driven model and control. Cloud (Azure) deployment of modeling algorithms in Python.

2015–2021

Ph.D. Candidate

RESEARCHER · Cotutelle - Umons-Belgium/Unal-Colombia 

Extended dynamic mode decomposition • Koopman operator • Regions of attraction • Nonlinear models • Model predictive control •

2010–2015

Lecturer, Automation Salesman, Teaching Assistant, Project Manager VARIOUS POSITIONS · Colombia

Control systems lectures • Quote and sell automation solutions • Laboratory and complimentary lectures • Automate banking solutions • Manage post-sales activities.

DEGREES

2021 **Philosophical Doctor in Engineering Science / Mechanical and Mechatronic Eng.**

PH.D. · Umons/Unal · Bel/Col 

2014 **Master of science in Electronic Engineering**

M.SC. · Los Andes · Colombia 

2010 **Electronic Engineer**

B.S. · Los Andes · Colombi 

HOBBIES

Tennis

Readig

Cycling

HIIT

CERTIFICATES & GRANTS

2021 Artificial Intelligence

2014 Sales Management

2010 Project Management

PUBLICATIONS

2023 *Evaluation of the Regions of Attraction of Higher-Dimensional Hyperbolic Systems Using Extended Dynamic Mode Decomposition*·Automation(4(1)p.57–77).

2022 *A Matlab Toolbox for Extended Dynamic Mode Decomposition Based on Orthogonal Polynomials and pq Quasi-Norm Order Reduction*·Mathenatics(10(20)p.3859).

STRENGTHS

focused  autonomous  resilient 

adaptable  communication
