

Ph.D., M.Sc.

CAMILO GARCÍA TENORIO

Dr. of Engineering Sciences / Mechanical and Mechatronic Eng.

FACTS

Areas of specialization

Control Systems • Data-Driven Control
• Machine-Learning • Identification
• Subspace Methods • Digital-Twins
• Industry 4.0 • Matlab
• Databricks • Azure

SKILLS

Languages

Spanish | C1 
English | C1 
French | B1 

Interests

OS:   

IT & programming

MATLAB 
python 
linux 
Julia 
L^AT_EX 

SHORT RESUMÉ

- 2020–202x **Post-Doctoral Researcher**
RESEARCHER · Université de Mons 
Data-driven modeling and control of industrial production systems, (lime production in PFR-kiln, and biochemical reactors for the pharmaceutical industry). Development of the pqEDMD algorithm: a system agnostic platform for data-driven model and control. Cloud (Azure) deployment of modeling algorithms in Python.
- 2015–2021 **Ph.D. Candidate**
RESEARCHER · Cotutelle - Umons-Belgium/Unal-Colombia 
Extended dynamic mode decomposition • Koopman operator • Regions of attraction • Nonlinear models • Model predictive control •.
- 2010–2015 **Lecturer, Automation Salesman, Teaching Assistant, Project Manager**
VARIOUS POSITIONS · Colombia 
Control systems lectures • Quote and sell automation solutions • Laboratory and complimentary lectures • Automate banking solutions • Manage post-sales activities.

DEGREES

- 2021 **Philosophical Doctor in Engineering Science / Mechanical and Mechatronic Eng.**
PH.D. · Umons/Unal · Bel/Col 
- 2014 **Master of science in Electronic Engineering**
M.Sc. · Los Andes · Colombia 
- 2010 **Electronic Engineer**
B.S. · Los Andes · Colombi 

HOBBIES

CERTIFICATES & GRANTS

- 2021 Artificial Intelligence
2014 Sales Management
2010 Project Management

STRENGTHS

focused autonomous resilient
adaptable communication
